

I would like to nominate Ms. Jill Fields, my 7th grade math teacher for the Extra Mile Award. Ms. Fields is the hardest working teacher I have ever known. That is not an exaggeration!! Being a math teacher can be challenging, but Ms. Fields makes it look easy. She possess many attributes. She is interactive, engaging, inspiring, knowledgeable, compassionate and understanding. Ms. Fields knows that math does not come easy to everyone, she is always willing to explain the concepts taught in class to each individual student if they need help. Even when the class is chaotic Ms. Fields perseveres and gets the class under control in a timely and respectful manner. Ms. Fields is such a great teacher that I go to her every morning before school starts for extra help. She always greets me with a smile. My perspective on math has changed significantly because of her gentle and kind manner. She has inspired me to work harder and it shows in my grades. I will be forever grateful to Ms. Fields and thank you for considering my nomination.
