

Wanda Nesbitt nominated by Charlotte Hoppin -

Ms. Nesbitt teaches us Greek and Latin roots. She gives helpful feedback, and she teaches us things in math. She entered the WordMasters contest for all of the kids in Links. I have learned tons of new words. I have also learned math strategies that make math so much easier for me. She was the one who taught me nouns, verbs, adjectives, pronouns, proper nouns, and so much more. One time, we made kites with her. She even taught me the order of operation AND exponents! She creates lots of fun games and I have learned so much from her. She let us make slides about a book and then we get to read the book to a grade of our choice. She really has gone the extra mile this year.
